GO_Biological_Process_2021
regulation of nitric-oxide synthase activity (GO:0050999)
inflammatory response (GO:0006954)
negative regulation of extrinsic apoptotic signaling pathway in absence of ligand (GO:2001240)
negative regulation of signal transduction in absence of ligand (GO:1901099)
positive regulation of monooxygenase activity (GO:0032770)
regulation of extrinsic apoptotic signaling pathway in absence of ligand (GO:2001239)
positive regulation of glial cell proliferation (GO:0060252)
positive regulation of heat generation (GO:0031652)
regulation of fever generation (GO:0031620)
positive regulation of fever generation (GO:0031622)
